## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1 to 12 and 34 to 42, drawn to semiconductor device, classified in Class 257, Subclass 359;
  - II. Claims 13 to 33, drawn to a process for making a semiconductor device, classified in Class 438, Subclass 14+
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, since the invention of the Group I invention could be made directly depositing a crystalline semiconductor layer with different thicknesses instead of crystallizing amorphous layers (Claim 13).
- 3. Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/774,888

Art Unit: 2814

4. A telephone call was made to Mr. Jeffery Costellia on 2/28/01 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Costellia stated that the Applicants prefer a written restriction.

5. The Applicants are advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
